- Google Analytics
- Data Storytelling
- Team Collaboration

certifications

- Power BI & Tableau
- AWS Python
- Python Master Class
- Front-End Development
- UI/UX Fundamentals

Sandeep Yalamanchili

about

Recent Computer Science graduate and Data Analyst with hands-on experience in SQL, Python, Power BI, and Tableau. Skilled at converting raw datasets into meaningful insights through interactive dashboards and cloud-integrated solutions. Passionate about enabling data-driven decisions in fast-paced, collaborative environments.

education

10th Class (CBSE)	2020
V.S. St. John's Higher Secondary School	
Intermediate (MPC)	2022
Resonance Vijayawada	
B.E. in Computer Science and Engineering	2026
Sathyabama Institute of Science and Technology, Chennai	
Relevant coursework: Database Management, Data Mining, Statistics, Machine Learning.	

projects

QR Cloud — AWS QR Code Generator	2024
Personal Project	
- Developed a Python-based QR code generator converting URLs and text to QR images with automatic AWS S3 upload. - Implemented input validation and error handling, ensuring reliable QR generation and seamless cloud storage integration. - Designed for scalability — the S3 architecture supports unlimited storage with low-latency access across devices.	
Customer Retention Dashboard	2023–2024
Academic Project	
- Analyzed customer acquisition and retention data in Power BI, identifying patterns across demographics, purchase frequency, and churn. - Built interactive dashboards tracking KPIs including Customer Lifetime Value (CLV), churn rate, and NPS. - Delivered actionable recommendations identifying high-value customer segments for targeted marketing campaigns.
